PERSONAL STATEMENT

Proactive and results-driven professional with experience at Çankaya University, where I enhanced student comprehension and engagement. Leveraging strong documentation and collaborative teamwork skills, I effectively contributed to project success and organisational growth.

Demonstrated leadership in developing innovative marketing strategies and technical expertise in building mobile applications using React Native with Expo and AWS, as well as developing websites using Nextjs and Java Spring.

In addition, I am actively developing my skills in cybersecurity, with hands-on experience in ethical hacking tools and secure application development practices. These experiences underscore my commitment to excellence, continuous learning, and delivering impactful solutions.

WORK EXPERIENCE

Software Engineer Intern
January 2025 - Present
Bluesense, Canada

- Built a mobile application, Smart Beauty, using Jetpack Compose Kotlin, enhancing user experience with modern UI components.
- Developed a dynamic website using Next.js, ensuring responsive design and optimal performance.
- Collaborated with the software development team to design, develop, and maintain various projects.
- Monitored project progress, identified issues, and proposed effective solutions to ensure timely delivery.
- Participated in code reviews, team meetings, and agile development processes to improve software quality.

Undergraduate Teaching Assistant
October 2024 - June 2025
Çankaya University

- Provided support for SENG 101, 106, 205, 271, and 272 courses, focusing on project management, SRS/SDD documentation, coding, and diagram creation.
- Assisted students with algorithm questions in C/Java laboratories, ensuring deeper understanding of core concepts.
- Identified student challenges and collaborated with the lead instructor to implement effective solutions.
- Contributed to the development and implementation of projects and lesson plans to enhance the learning experience.
- Explained assignments and test instructions, improving student comprehension and performance.

Project Management Intern
February 2025 - March 2025
TNC Group

- Collaborate with cross-functional teams to plan, execute, and monitor projects, ensuring timely delivery and alignment with project goals.
- Assist in project documentation, including project plans, timelines, and status reports to track progress and identify potential risks.
- Participate in team meetings, contributing insights and suggestions for workflow improvements.
- Utilize project management tools to organize tasks, assign responsibilities, and streamline communication among stakeholders.
- Support resource allocation and budget tracking, ensuring efficient use of resources throughout project lifecycles.
- Conduct post-project evaluations, identifying strengths, challenges, and opportunities for future improvements.

Founder
Selmorica
September 2024 - Present

- Launched and actively managed Trendyol store, specializing in unique product sales while overseeing e-commerce operations.
- Developed and maintained websites and mobile applications, ensuring user-friendly experiences and seamless functionality.
- Conducted market research to identify emerging trends, customer needs, and competitor strategies.
- Applied financial models to support business growth and optimize operational efficiency.
- Created and implemented an effective marketing and sales strategy, driving brand visibility and revenue growth.

Software Engineer Intern
July 2024 - August 2024

Turkish Ministry of Agriculture and Forestry/ ZB Software Company, Ankara

- Gained hands-on experience with industry-specific procedures, systems, and technologies.
- Worked on real-world projects, enhancing problem-solving and coding skills.
- Collaborated with cross-functional teams to streamline project workflows.
- Applied software engineering principles to develop and optimize applications.

Mentor
Kodluyoruz
February 2023 - June 2023

- Guided students through projects using NumPy and Seaborn libraries with Python, promoting data analysis skills.
- Suggested effective techniques and methodologies to help mentees achieve educational, social, and professional goals.
- Built strong relationships with mentees by planning and participating in collaborative activities.
- Encouraged critical thinking and problem-solving through hands-on learning experiences.

EDUCATION

Bachelor of Science in Software Engineering
2021 - 2026
Çankaya University
GPA: 3 / 4

QUALIFICATIONS

Foundations of Project Management/Google

Unsupervised Learning, Recommenders, Reinforcement Learning
/Stanford University

Supervised Machine Learning: Regression and Classification
/Stanford University

PROJECTS

HotelReservation
Inspired by platforms like Trivago

- Developed an advanced hotel reservation system with admin and user modules.
- Enabled admins to manage users, create hotels, and oversee reservations, including the ability to simulate user experiences.
- Implemented user-friendly search filters for hotel reservations based on specific features and criteria.

Restaurant App
Google Places API Integration

- Created a restaurant listing app using Google Places API, displaying nearby restaurants based on user location.
- Integrated sorting by price range and robust search functionality, enhancing user convenience and experience.

ProBee
Multi-University Project & Workshop Management System

- Originally designed to manage graduation projects, expanded into a multi-university platform for workshops, competitions, and project management.
- Implemented role-based functionalities and institutional authentication, ensuring secure access for different user types.

KPSSKartYanımda
Educational Card-Based Learning Application

- Developed the backend infrastructure, enabling users to organize and review topics efficiently through card-based content.
- Collaborated with a teammate for the user interface design, ensuring a seamless user experience.

Focus App
Productivity and Time Management App

- Created a visually appealing and functional mobile application, reflecting expertise in mobile development and user-centric design.
- Integrated features to enhance focus and productivity, while ensuring an intuitive user interface.
